Available from October 2026 | Open to relocation within Germany | Valid German residence permit

Professional Experience

Siemens Energy AG

Jan 2026 – Present

Working Student – Digitalization, QA & AI Automation

Mülheim a.d.R., Germany

- Acted as **technical liaison** between business stakeholders, developers, and QA engineers across agile sprint cycles – independently translating requirements into test coverage plans and driving issues to resolution cross-functionally, managing multiple internal stakeholders in parallel.
- Identified, reproduced, and tracked **20+ software defects** with structured reproduction steps and expected-vs-actual analysis; validated enterprise reports (TSR, NDT, Customer Outage) including PDFs up to **958 pages** for data integrity and sequencing accuracy.
- Extended **Salesforce Agentforce** AI automation agents via **Flow Builder** to streamline work-order summarisation and service milestone tracking; authored business process documentation and workflow diagrams in Draw.io to support technology rollout.

Siemens Energy AG

Sep 2025 – Dec 2025

Technical Intern – Digital Twin & 3D Measurement

Mülheim a.d.R., Germany

- Supported deployment of **Digital Twin** measurement workflows using PolyWorks and photogrammetry – operating 3D scanners and laser trackers for high-precision inspection of physical industrial components, similar in spirit to material handling and automation equipment commissioning.
- Developed **Python automation scripts** and PolyWorks macros to eliminate manual steps and troubleshoot inconsistencies in measurement pipelines, improving inspection throughput.

University of Duisburg-Essen

Oct 2024 – Jul 2025

Course Tutor – Computer Engineering, LDDS, APP, GTI

Essen, Germany

- Led weekly tutorials and lab sessions for **100+ students** across four core engineering courses (C, C++, Software Engineering, Digital Logic); authored technical learning documentation and troubleshoot student code and hardware-logic issues in real time.

Projects

Bachelor Thesis – Budgeted Multipath Overlays for Network Fault Resilience | Python, NetworkX, Graph Theory

- Designing heuristic algorithms for resilient multipath overlay placement across backbone and grid topologies – engineering the same fault-tolerance, redundancy, and integrated-systems principles that underpin large-scale automated infrastructure deployments.

Face Recognition System | Python, OpenCV, MySQL, Tkinter

- Built real-time face detection and recognition pipeline using Haar cascades and OpenCV; integrated **MySQL** database backend and GUI; achieved **90% recognition accuracy** on a controlled dataset through iterative troubleshooting and tuning.

HalloHub – International Student Onboarding App | React Native, Expo | Hackathon Finalist

- Identified a real operational gap – international students navigating visa, housing, and university systems with no centralised resource – and delivered a full mobile solution under hackathon time constraints, coordinating a small cross-functional team.

Technical Skills

Automation & Deployment: Salesforce Agentforce, Flow Builder, UiPath StudioX, RPA, AI Workflow Design, Python automation scripting
Systems & Troubleshooting: Defect Management, Regression & Functional Testing, Root-Cause Debugging, Technical Documentation & Procedures
Cloud & Infrastructure: AWS (EC2, S3, Lambda, API Gateway, DynamoDB, CloudFormation, IAM), Microsoft Azure, Cloud Architecture, Serverless Computing
Precision & Physical Systems: PolyWorks, Photogrammetry, 3D Scanners, Laser Trackers, Point-Cloud Inspection
Data & BI: Power BI, Microsoft Fabric, Microsoft Copilot, SQL query optimisation, Data Validation
Enterprise Platforms: Salesforce Field Service, Salesforce CRM, Draw.io
Languages: Python, Java, C++, C, SQL, JavaScript, HTML/CSS, PHP
Dev Tools & Frameworks: Git, GitHub, React Native, Tkinter, NetworkX, Eclipse, Expo
Core Areas: Systems Engineering, Network Architecture, Security in Communications, OOP, Algorithms, DBMS, Multithreading

Education

University of Duisburg-Essen Oct 2023 – Present
B.Sc. Computer Engineering – Systems & Software Engineering Duisburg, Germany

- Current GPA: **1.8** (German scale) | Deutschlandstipendium Scholar 2026, sponsored by DEICHMANN
- Relevant coursework: Computer Networks & Communication Systems, Security in Communications, Data Structures & Algorithms, Operating Systems, Software Engineering, Databases, Control Engineering, Modelling & Simulation

Certifications & Professional Development

Salesforce | *Flow Builder, Field Service Lightning, Agentforce*
Microsoft | *Power BI, Microsoft Fabric, Microsoft Copilot*
Automation | *UiPath StudioX, RPA Fundamentals*
DataCamp | *Understanding AI, Machine Learning & Generative AI Concepts*
Forage Projects | *10+ completed*

- JP Morgan Chase (Software Engineering), Quantum (Data Analytics), Deloitte (Data Analytics & Forensic Technology), Commonwealth Bank (Cybersecurity), Datacom (Cybersecurity Operations), Datacom (AI in the Workplace), Citi (Technology), Skyscanner (Front-End Development), Tata Group (Cloud & Technology), Siemens (Technology)

Languages

English | C2 – Native proficiency
German | B2 – Professional working proficiency
Hindi | C2 – Native
Kannada | C2 – Native

Additional Information

Community & Volunteering

- **Cultural Manager** – DEGIS, German Association for International Students (Jan 2024 – Present): coordinate onboarding, orientation, and intercultural events for international student volunteers.
- **Language Guide** – Café Lingua (Apr 2024 – Present): facilitate weekly German/English sessions for **50+ learners**; contributed to a **50% increase** in participant engagement over one year.

Achievements

- **Deutschlandstipendium Scholar 2026** – merit-based national scholarship, University of Duisburg-Essen, sponsored by DEICHMANN.
- **Winner** – Interdisciplinary Robotic Arm Arduino Workshop.
- Participant in **5+ hackathons** across web development, AI, and automation.
